

Beginner Submission Guide

Technology in Society (Elsevier) — Step by Step

For: First-time academic paper submitters **Assumes:** You have never submitted to any journal before **Author:** Shaurya Gupta, SM Shetty International School

SECTION 1: Before You Start — Accounts to Create

1.1 ORCID ID (free, 5 minutes)

- Go to: <https://orcid.org/register>
- Enter your name, email, create a password
- You'll get a 16-digit ID like 0000-0002-1825-0097
- **Save this number** — you'll need it for submission
- Shaurya's ORCID: 0009-0001-7642-9247

1.2 Elsevier Editorial Manager Account (free, 5 minutes)

- Go to: <https://www.editorialmanager.com/tis/>
 - Click “Register Now”
 - Fill in: name, email, ORCID ID, affiliation (“SM Shetty International School”)
 - Choose a username and password
 - **Save your login credentials somewhere safe**
-

SECTION 2: Files to Have Ready

Before you open the submission portal, have these files on your computer:

1. [PASS] FINAL_SUBMISSION_MANUSCRIPT.docx — Manuscript (Word format, 183 KB)
 2. [PASS] FINAL_SUBMISSION_MANUSCRIPT.tex — Manuscript (LaTeX, backup)
 3. [PASS] FINAL_SUBMISSION_MANUSCRIPT.pdf — Manuscript (PDF, for reference)
 4. [PASS] COVER_LETTER.pdf — Cover letter (70 KB, formatted PDF)
 5. [PASS] COVER_LETTER.md — Cover letter (plain text backup)
 6. [PASS] HIGHLIGHTS.md — 5 bullet points for highlights
 7. [PASS] All 5 figure PDFs from the **figures/** folder
 8. [PASS] AUTHOR_DECLARATIONS.md — Author info reference
-

SECTION 3: Access the Submission Portal

1. Go to: <https://www.editorialmanager.com/tis/>
 2. Log in with your Editorial Manager username and password
 3. Click “**Submit New Manuscript**”
 4. This starts the submission wizard
-

SECTION 4: Article Type Selection

When asked to select article type, choose:

“Research Article” (or “Full-length Article”)

This is the standard type for unsolicited original research. Do NOT select: - Review Article (unless it’s a literature survey) - Short Communication (for brief reports) - Special Issue (unless invited)

SECTION 5: Metadata Entry

The system will ask for:

5.1 Title

Copy and paste the full title:

Institutional Observability Under Scaled AI Governance: Deployment-Scale Capacity Degradation

5.2 Abstract

Copy the structured abstract from the manuscript (Background, Methods, Results, Conclusions).

5.3 Keywords

Enter these 10 keywords (comma-separated):

AI governance, oversight saturation, institutional observability, human-in-the-loop, compliance

5.4 Authors

Add yourself: - First name: Shaurya - Last name: Gupta - Email: shauryagupta042@gmail.com - Affiliation: SM Shetty International School, Mumbai, India - ORCID: 0009-0001-7642-9247 - Check “Corresponding author”

SECTION 6: File Upload Order

Upload files in this order:

1. **Manuscript** — FINAL_SUBMISSION_MANUSCRIPT.docx (select “Manuscript” as file type)
2. **Cover Letter** — COVER_LETTER.pdf (select “Cover Letter” as file type)
3. **Figure 1** — fig_saturation.pdf (select “Figure” as file type)
4. **Figure 2** — fig_divergence.pdf
5. **Figure 3** — fig_routing.pdf
6. **Figure 4** — fig_depth_kde.pdf
7. **Figure 5** — fig_sedi.pdf
8. **Highlights** — Copy-paste from HIGHLIGHTS.md (select “Highlights” as file type)

If the system asks for supplementary files, you can skip this. Supplementary appendices are optional.

SECTION 7: Cover Letter

The system will have a text box for the cover letter. You can either: - Upload `COVER_LETTER.pdf` as a file - OR copy-paste the text from `COVER_LETTER.md`

The cover letter should already be filled in with: - Your name and school - What the paper is about - Why it fits Technology in Society - Suggested reviewers (5 names with affiliations)

SECTION 8: Suggested Reviewers

The system will ask you to suggest reviewers. Enter these 5:

1. **Dr. Inioluwa Deborah Raji** — University of California, Berkeley (AI auditing, algorithmic accountability)
2. **Dr. Sarah Lebovitz** — University of Michigan (AI ground truth, human-AI interaction)
3. **Dr. Meg Young** — Cornell Tech / Data & Society (public sector algorithmic accountability)
4. **Dr. Michael Veale** — University College London (AI regulation, GDPR, governance-by-design)
5. **Dr. Frank Pasquale** — Cornell University (algorithmic accountability, technology law)

You can also list reviewers to exclude (optional). Leave blank unless there's someone you specifically don't want reviewing.

SECTION 9: Declarations and Questions

The system will ask several yes/no questions:

- “Is this manuscript under consideration elsewhere?” → No
- “Has this work been published previously?” → No
- “Did you use AI tools in preparing this manuscript?” → Yes (disclosed in manuscript)
- “Does this research involve human subjects?” → No
- “Do you have any competing interests?” → No
- “Did you receive funding for this research?” → No

Answer honestly. The AI disclosure is already in the manuscript.

SECTION 10: Final Review and Submit

Before clicking submit:

1. **Review the PDF proof** — The system will generate a merged PDF. Check:
 - All pages are there
 - Figures appear correctly
 - No garbled text or missing symbols
 - Author name and affiliation are correct
2. **Check file designations** — Make sure each file is labeled correctly (Manuscript, Figure, Cover Letter, etc.)

3. Click “Submit”

You’ll get a confirmation email within a few minutes. Save it.

SECTION 11: Common Mistakes to Avoid

Mistake	How to Avoid
Uploading PDF as manuscript	Upload .docx, not .pdf. PDF-only submissions are rejected
Forgetting figures	Upload all 5 figure files individually
Wrong article type	Select “Research Article,” not “Review” or “Short Communication”
Missing ORCID	Create one at orcid.org before starting
Wrong corresponding author	Make sure your email is listed as corresponding author
Cover letter too generic	Use the one provided — it’s written for this specific paper
Highlights too long	Each bullet must be under 85 characters
Forgetting to check PDF proof	Always review the merged PDF before final submit

SECTION 12: What Happens After Submission

Day 0–5: Technical Check

Editorial office verifies all files are present and format is correct. If something is missing, they’ll email you.

Day 5–21: Editor Desk-Screen

The Editor-in-Chief or a Subject Editor reads your abstract, introduction, and cover letter. They decide: - **Desk reject** — Paper doesn’t fit or has fatal flaws (you’ll get an email within 2–3 weeks) - **Send to review** — Paper moves to peer review (you’ll get an email when reviewers are invited)

Week 4–8: Peer Review

If sent to review, 2–3 reviewers will read your paper and write reports. This takes 4–8 weeks.

Week 8–16: Decision

You’ll receive one of: - **Accept** (rare on first submission) - **Minor revision** (fix small things, resubmit) - **Major revision** (significant changes needed, resubmit) - **Reject** (paper not accepted; you can submit elsewhere)

If You Get Revisions

Don't panic. Most papers get revisions. Read the reviewer comments carefully. Fix what they ask for. Write a response letter explaining every change. Resubmit.

If You Get Rejected

Also don't panic. Every published author has rejections. Read the reviews. Improve the paper. Submit to another journal.

SECTION 13: Expected Timelines

Stage	How Long
Confirmation email	Within 1 hour
First decision (desk reject or send to review)	~9 days average
Decision after review	~79 days average
Final acceptance (if successful)	~195 days average
Online publication after acceptance	~2 days

These are averages from ScienceDirect. Your timeline may vary.
