

Final Submission Certification

Paper: “Institutional Observability Under Scaled AI Governance: Deployment-Scale Capacity Degradation in Human Oversight Pipelines” **Author:** Shaurya Gupta, SM Shetty International School **Date:** June 4, 2026 **Target Journal:** Technology in Society (Elsevier, ISSN 0160-791X)

1. Can this be submitted today?

YES.

All required files exist. All declarations are complete. All figures are verified. The manuscript compiles. The code runs. The repository is public. No placeholders remain.

2. Is any mandatory file missing?

NO.

File	Status
Manuscript (.docx)	[PASS] FINAL_SUBMISSION_MANUSCRIPT.docx
Manuscript (.tex)	[PASS] FINAL_SUBMISSION_MANUSCRIPT.tex
Manuscript (.pdf)	[PASS] FINAL_SUBMISSION_MANUSCRIPT.pdf
Cover letter (.pdf)	[PASS] COVER_LETTER.pdf
Cover letter (.md)	[PASS] COVER_LETTER.md
Highlights	[PASS] HIGHLIGHTS.md
Figure 1	[PASS] figures/fig_saturation.pdf
Figure 2	[PASS] figures/fig_divergence.pdf
Figure 3	[PASS] figures/fig_routing.pdf
Figure 4	[PASS] figures/fig_depth_kde.pdf
Figure 5	[PASS] figures/fig_sedi.pdf
AI disclosure	[PASS] In manuscript
Ethics statement	[PASS] In manuscript
Data availability	[PASS] In manuscript
CRedit statement	[PASS] In manuscript
Competing interests	[PASS] In manuscript
Acknowledgments	[PASS] In manuscript

3. Is repository inclusion recommended?

YES — and it is already done.

Repository: <https://github.com/SilverCoin256/oversight-saturation-sedi>

The repository contains all simulation code, figures, manuscript PDF, and cover letter. It is public, MIT-licensed, and includes a human-written README with reproduction instructions. For a high-school author making simulation claims, this repository dramatically increases credibility.

4. Are all declarations complete?

YES.

Declaration	Location	Status
AI disclosure	Manuscript, before references	[PASS] Names Windsurf/Cascade, describes use
Ethics	Manuscript, declarations section	[PASS] No human subjects
Data availability	Manuscript, declarations section	[PASS] GitHub URL provided
CRedit	Manuscript, declarations section	[PASS] All roles assigned to sole author
Competing interests	Manuscript, declarations section	[PASS] None declared
Acknowledgments	Manuscript, declarations section	[PASS] School affiliation noted
Funding	Manuscript, acknowledgments	[PASS] None received

5. Are all figures verified?

YES.

All 5 figures exist in both the submission `figures/` directory and the GitHub repository. All figures are generated from running code (`simulation/figure_generation.py`). All figures are referenced sequentially in the manuscript.

Figure	File	Size	Generated from code
Fig. 1: Saturation Curve	fig_saturation.pdf	35 KB	[PASS]
Fig. 2: Divergence Plot	fig_divergence.pdf	31 KB	[PASS]
Fig. 3: Routing Architecture	fig_routing.pdf	27 KB	[PASS]
Fig. 4: Review Depth KDE	fig_depth_kde.pdf	74 KB	[PASS]
Fig. 5: SEDI Degradation	fig_sedi.pdf	33 KB	[PASS]

6. Are all references verified?

YES.

16 references. All cited in text. All in Elsevier numbered format. All substantively discussed (not name-dropped). Core references are established (Meyer & Rowan 1977, Kingman 1961, Parasuraman & Riley 1997, Bovens 2007). Three 2026 workshop papers provide architectural context.

7. Are all compliance requirements satisfied?

YES.

36 of 36 compliance checks passed. See COMPLIANCE_AUDIT.md for details.

Final Verdict

[GREEN] SUBMIT NOW

The manuscript is submission-ready. All files exist. All declarations are complete. All figures are verified. The code runs. The repository is public.

Known Risks (do not block submission)

1. **No empirical validation** — Acknowledged in limitations. Inherent to theoretical paper.
2. **Author is a high school student** — Cover letter addresses this honestly. Some editors will desk-reject; others will be intrigued.
3. **CS/STS stylistic tension** — Introduction and conclusion rewritten with personal voice. Methods retain necessary formalism.
4. **Three workshop paper citations** — Cited substantively, not as padding. Defensible.

What to do now

1. Go to <https://www.editorialmanager.com/tis/>
 2. Log in
 3. Click “Submit New Manuscript”
 4. Follow BEGINNER_SUBMISSION_GUIDE.md
 5. Upload all files
 6. Click Submit
-

This certification is final. No further changes are required before submission.
