

Triple Check Report

Paper: “Institutional Observability Under Scaled AI Governance” **Date:** June 4, 2026

Three independent audits run. Results compared. Conflicts resolved.

Audit A: Elsevier Compliance Review

Auditor: Elsevier submission specialist **Scope:** Publisher-wide requirements, formatting, declarations

Findings

#	Check	Result
A1	Editable source provided (.docx + .tex)	[PASS]
A2	Structured abstract (4 sections)	[PASS]
A3	Keywords (10, within 6–10 range)	[PASS]
A4	AI disclosure present	[PASS]
A5	Ethics statement present	[PASS]
A6	Data availability with GitHub URL	[PASS]
A7	CRedit statement present	[PASS]
A8	Competing interests declared	[PASS]
A9	Cover letter present (PDF + .md)	[PASS]
A10	Highlights (5 points, all <85 chars)	[PASS]
A11	References in numbered format	[PASS]
A12	Figures sequential (1–5)	[PASS]
A13	Line numbers enabled	[PASS]
A14	Author name: Shaurya Gupta	[PASS]
A15	Affiliation: SM Shetty International School	[PASS]
A16	Email: shauryagupta042@gmail.com	[PASS]
A17	ORCID: 0009-0001-7642-9247	[PASS]
A18	All 5 figure PDFs verified	[PASS]
A19	GitHub repo public and accessible	[PASS]
A20	Simulation code runs	[PASS]

Verdict: [GREEN] PASS — No compliance issues. All Elsevier requirements met.

Audit B: Technology in Society Editor Review

Auditor: Handling editor perspective **Scope:** Editorial bar, journal fit, contribution quality

Findings

#	Check	Result
B1	Technology-society mechanism clear	[PASS] Throughput asymmetry explained
B2	Policy actors named	[PASS] Auditors, boards, vendors
B3	Methods appropriate	[PASS] State-space + MC simulation
B4	Figures support argument	[PASS] All 5 directly relevant
B5	Limitations honest	[PASS] Empirical gap acknowledged
B6	Writing style: CS/STS hybrid	[WARN] Math density may alienate some
B7	No empirical validation	[WARN] Biggest weakness
B8	Practical implications present	[PASS] Governance practitioners subsection
B9	Workshop paper citations (3 of 16)	[WARN] Defensible but not ideal
B10	O(N) notation throughout	[WARN] May need explanation for STS readers
B11	No alternative governance frameworks discussed	[WARN] Could strengthen Related Work
B12	Conclusion strong and policy-facing	[PASS]

Verdict: [YELLOW] BORDERLINE — The paper meets the editorial bar on contribution and policy relevance. The lack of empirical validation and the CS/STS stylistic tension are the primary concerns. Would send to review but expect revision requests.

Audit C: Submission Coordinator Review

Auditor: Research operations manager **Scope:** File completeness, portal readiness, practical blockers

Findings

#	Check	Result
C1	Manuscript .docx exists and opens	[PASS] 183 KB
C2	Manuscript .tex compiles	[PASS] 14 pages
C3	Manuscript .pdf generated	[PASS] 458 KB
C4	Cover letter .pdf exists	[PASS] 70 KB, 3 pages
C5	Cover letter .md backup exists	[PASS]
C6	Highlights file ready	[PASS] 5 points
C7	All 5 figures in figures/	[PASS]
C8	All 5 figures in repo	[PASS]

#	Check	Result
C9	Author declarations complete	[PASS]
C10	AI disclosure complete	[PASS]
C11	Data availability with URL	[PASS]
C12	Conflict of interest declared	[PASS]
C13	Ethics statement present	[PASS]
C14	Reproducibility statement present	[PASS]
C15	Repository statement present	[PASS]
C16	Beginner submission guide complete	[PASS]
C17	Suggested reviewers (5) with rationale	[PASS]
C18	No placeholder text remaining	[PASS]
C19	GitHub repo structure verified	[PASS]
C20	Code runs without errors	[PASS]

Verdict: [GREEN] PASS — All files present. No missing items. Portal-ready.

Conflict Resolution

Conflict 1: Is the paper submission-ready?

- **Audit A:** Yes (compliance)
- **Audit B:** Borderline (editorial bar)
- **Audit C:** Yes (file completeness)

Resolution: The paper is submission-ready on compliance and completeness. The editorial bar concern (empirical validation) is inherent to the paper’s theoretical nature and cannot be resolved without new data collection. The paper should be submitted with honest limitations.

Conflict 2: Are the workshop paper citations acceptable?

- **Audit B:** Defensible but not ideal
- **Hostile Reviewer C:** Inappropriate

Resolution: The workshop papers are cited substantively, not as padding. They provide architectural context for deployed systems. This is defensible. If a reviewer objects, the author can explain the rationale in a revision.

Conflict 3: Is the writing style appropriate?

- **Audit B:** CS/STS hybrid may alienate some readers
- **Hostile Reviewer C:** Reads like a CS workshop paper

Resolution: The introduction and conclusion have been rewritten with personal voice and reduced technical density. The methods sections retain mathematical formalism because that is where it belongs. The hybrid style is a feature of interdisciplinary work, not a bug.

Overall Triple Check Verdict

[GREEN] SUBMISSION-READY

The manuscript passes compliance (Audit A), is file-complete (Audit C), and meets the editorial bar with acknowledged limitations (Audit B). The remaining concerns — empirical validation, CS/STS stylistic tension, workshop citations — are either inherent to the paper’s nature or defensible in revision.

The paper should be submitted now.
